Dear FCC:

I am against any increase in rates in telecommunications. I would rather see  
the waste stopped on your end rather than throwing money at the problem.

We have already made changes to our use of home and cell phones in which we were  
spending close to \$1000 a year. This does not include long distance calls, just  
the fee for having a phone and the taxes.

Thank you for your prompt attention to this matter. Please provide a written  
response indicating the status/resolution of this matter.

Very truly yours,

Joe Garlena
